

for iPhone/iPad/iPod Touch

Slingshot-Launching Word Game Available in Apple's App Store

Word Sling combines the arcade action of touch shooting with the casual fun of word games!

Shoot letters from your sling shot to make words and score points! Score enough points to move on to the next level. Use bombs to destroy any unwanted letters that get in your way. Combine letters with score multipliers to double or triple your score, then compete with your friends for the highest score. You'll need to use your brain to find words, and your hand to shoot the target!

Word Sling is a great game to play whether you have one free hand and 5 minutes on the subway, with friends and family, or on a quiet evening at home. *Word Sling* is kid friendly, and can be a fun way to help practice spelling. This app is great for players of all ages and skill level.
